

- 1) This table shows the lengths of some of the longest rivers in the world:

Amazon	6400km
Congo	4700km
Mekong	4350km
Nile	6650km
Yangtze	6300km
Yellow River	5464km

- a) Which rivers are between 5500km and 6500km in length?
- b) What is the total combined length of the Yellow River, Nile and Yangtze?
- c) What is the difference between the longest and the shortest rivers?
- d) Name two rivers which have a combined length of 11 000km.
- e) Which two rivers have a difference of 1950km?

- 1) a) Amazon and Yangtze
- b) 18 414km
- c) $6650 \text{ (Nile)} - 4350 \text{ (Mekong)} = 2300\text{km}$
- d) Congo and Yangtze or Mekong and Nile
- e) Mekong and Yangtze or Nile and Congo
